Take 395 North to Stead Blvd.

Turn right onto Stead Blvd.

Drive east on Stead Blvd. approximately 2.1 miles

The build site will be on your left

Build days are Tuesday and Thursday thru Saturday

Worksite Information

Proper Dress: Normally, the most appropriate attire is long pants and long-sleeved shirts. Long sleeves are usually appropriate even in the summer, as they provide skin protection from the sun, as well as scrapes and scratches. In cold weather, sweat shirts and other cold-weather clothing are recommended. Wear comfortable shoes with low heels and adequate traction that cover the entire foot (no sandals). You should bring gloves to protect your hands.

No one under 16 years of age is allowed on the worksite while building is in progress. To operate power tools, you must be at least 18 years of age.

Hours: We normally start the workday at 9AM, and work until early afternoon. You will check in with our Construction Manager Mark Van Tassel at the construction trailer. You may park at the curb in front of the worksite (except in front of the fire hydrant). We ask that you sign in and out, at the start and end of the volunteer day.

What to bring: Because we do not furnish lunch, and there is a lack of accommodations near the worksite, we encourage you to bring plenty of your own food and non-alcoholic beverages for your own consumption. We have standard hand tools and building materials. If you want to use your own hand tools, we require that you sign the waiver on the application before using your tools at the worksite.
